

“Do your existing Building and Safety fees cover your true cost of plan check and inspection services?”

Willdan Fee Studies

Willdan routinely provides comprehensive user fee study services to public agencies covering engineering/public works, planning, public safety, parks and recreation and general administrative services. For Building and Safety Fee Studies, our analysis will:

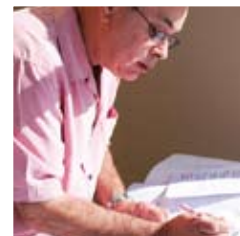

- Accurately determine the true cost of plan check and inspection services
- Assess the feasibility of modifying your fee structure from valuation-based to cost-of-service based methodologies
- Include input and peer review by our local building official staff
- Provide simple, easy-to-implement fee schedule recommendations
- Address changing costs over time with automatic updates
- Present a written plan for implementing recommended fee structure
- Use transparent policy and technical assumptions
- Provide customized, user-friendly models

The only way you can really know for certain is to conduct an updated fee study.

Willdan is the only firm that conducts user fee studies and at the same time provides Building and Safety Department functions to local agencies. As a result of this unique combination of service skills, Willdan brings value to your city in the following ways:

- Our technically defensible fee schedules are superior to that of our competitors
- Our intimate knowledge of each portion of the service delivery function provides for greater accuracy, reducing the likelihood of potential challenges
- Our resulting schedules are, therefore, easier to implement
- We can develop alternative methodologies for those communities that want to move away from a valuation-based approach.

A representative listing of Willdan’s combined experience in Building and Safety service delivery and fee analysis is presented in the graphic shown on the following page.

Willdan, a leading provider of Building Safety and Fire Prevention plan review and inspections services, has added electronic plan review to its service offerings.

Willdan Building and Safety’s spectrum of services enables clients to select the services that best fit their needs—from plan review, overload inspection, and/or counter-assistance functions, to the integrated and comprehensive service of a fully-staffed Building and Safety Department. Discipline types include:

- Accessibility
- Architectural
- Electrical
- Energy
- Fire
- Green Building
- Mechanical
- Plumbing
- Electrical
- Structural
- Civil

Willdan Financial Services specializes in providing revenue generation, enhancement, and administration services to public agencies. We are a service-oriented firm that delivers a high quality product to public agencies—and ultimately, to the public. We serve as an extension of our clients’ staff, augmenting existing personnel by providing specialized expertise. Our clients include more than 800 cities, counties, state agencies, port authorities, housing agencies, special districts, and school districts in more than 38 states. We further support our clients by conducting year-round workshops and on-site training to assist them in keeping current with the latest developments in our areas of expertise.
